Multiselect

The multi-select function can be used to move several items closed:

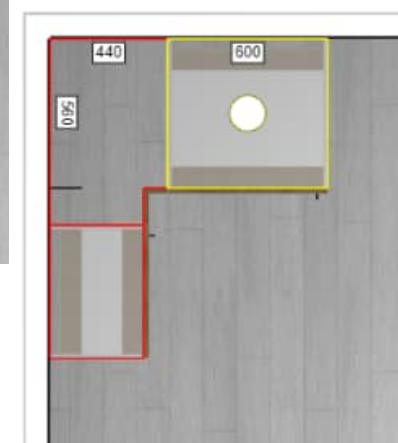

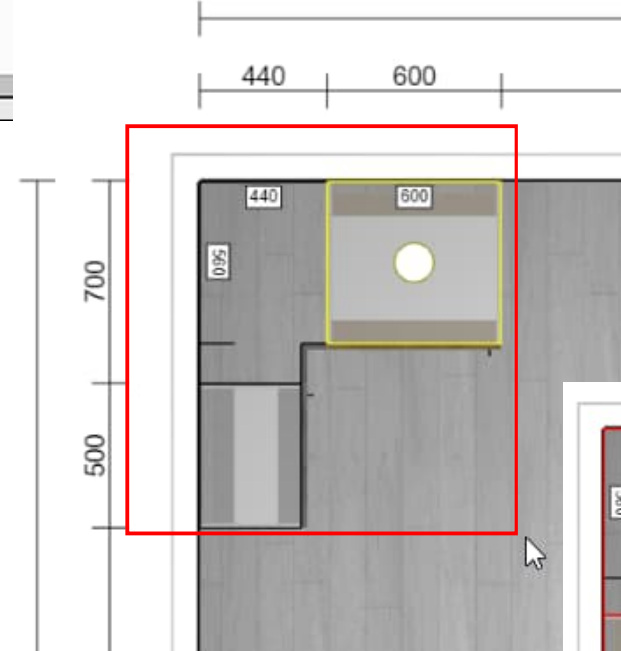

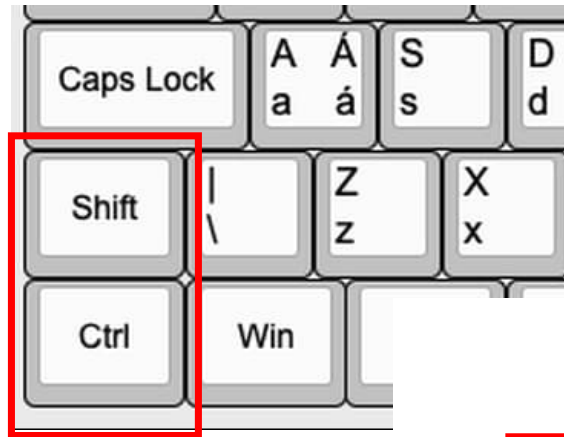

Select base cabinet (yellow frame)

Hold down the Shift key and use the mouse pointer to frame the desired number of lockers with the square red marking

The additionally selected cabinets are outlined in red

Cabinets can then be moved using the base cabinet

Alternatively, several cabinets can be added individually using the CTRL key

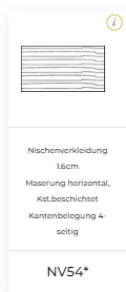

Preconfiguring article dimensions

The dimensions of some items such as fitting pieces, niche materials or cover shelves can be preconfigured before drag & drop into the room planner
